PRODUCT DATA SHEET

CONTEX FULLY SYNTHETIC LITHIUM EP 2

Description

CONTEX FULLY SYNTHETIC LITHIUM GREASE EP2 is a high quality, high performance automotive grease which combines with synthetic base stock ad a complex lithium soap thickener. It provides a high dropping point and the additives impart on optimum extreme pressure properties and excellent resistance to water wash out and outstanding protection against rust and corrosion. Manufactured to NLGI2 grade.

Benefits:

- Protection against rust and corrosion
- Excellent water wash-out
- Excellent wear protection against heavy loads
- Outstanding structural stability under heavy duty service
- All-purpose automotive service

Application:

Recommended for automotive applications both high and low temperature. Best suited in disc brake wheel bearings and balls and steering joints

Typical Properties:

Characteristics	Fully Synthetic Lithium EP2
NLGI Grade	2
Appearance	Smooth & Homogenous
Color	Red
Type of Soap	Lithium Complex
Work Penetration	280
Drop Point, ^{0}C Min	190
Corrosion Prevention	Pass
